

MEMORANDUM
Department of the Navy

Date: 17 Feb 91
From: CO, NR PWC SUBIC
To: N3, 3rd NCR

Via: COMUSNAVLOGSUPFOR (N7)

Subj: INPUT ON COMUSNAVLOGSUPFOR AUGMENT

from CEBAC RUS

Ref: (a) Visit with LCDR Phillips, 11 Feb 91, at ASU Bahrain

Encl: (1) Existing Rate Matrix
(2) Desired Rate Mix

1. During ref (a), I was requested to address several issues to help you plan for our Det's replacement personnel. These issues included the following:

a. Current Staffing:	Officers:	4
	Enlisted:	<u>142</u>
	Total:	<u>146</u>

b. Organization: While at Subic Bay, we were organized as a Battalion, with an S-1 through S-4 staff and Alfa, Bravo, and Charlie Companies. Total personnel was 250. On the Det's arrival in Bahrain, we did a reverse augment of Public Works and deployed various small Dets as detailed in encl (1). Day to day opcon of the personnel in PW is to the PWO, while the Dets continue to report to me. All administrative responsibilities remain with me and go on to our parent unit, PWC Subic (our UIC remains PWC Subic's). PSD Subic holds our records. As Det manning reqts vary, the shortfall/excess come from/go to PW.

c. Projects Working: The Dets are doing primarily PW type functions. We have developed a nine man "Sprung" building crew to take over erection of contractor-defaulted units. They are going to Abu Dhabi the 15th, and will move on to FLEHOSP 5, Half Moon Bay, and other locations as necessary. We are also working on the 47th Army Field Hospital at the ASU through the PW specific projects division. These jobs include a new wood galley, five wood heads with showers, underground shore power distribution, and perimeter security fencing. The latter two are permanent ASU facilities.

d. Communications: We have commercial telephone contact with all Dets, and have twice a day call-ins.

e. Berthing: Dets are living in quarters provided by gaining command. Jeddah is in a compound, Abu Dhabi is in trailers in the camp, Hurghada in a "motel 6" type of hotel, Flehosp 5 in tents. The "main body" was in tents at the 47th Field Hospital, and is slated to move into a compound.

17 Feb 91 Memo, NRPWC Subic to 3rdNCR

f. Messing: Again Dets are fed by the gaining command, either at the compounds or hotel facilities, the Main Body eats at the Army field mess. We furnish three messmen.

g. Tools: COMUSNAVLOGSUPFOR has purchased additional tools which we have merged with the existing ASU PW CTR. We draw tools as needed, whether for Dets or project work at ASU. The gaining commands at the Dets have been very helpful in buying the specialty tools we've needed to complete their missions.

h. CESE: We have none organic. Either use PW's or rent as needed.

i. 782 gear/Weapons: We have M-16's, .45's, and shotguns furnished by RNCF. All 782 gear was purchased by COMUSNAVLOGSUPFOR and remains their property. There is enough to outfit 175 personnel.

j. OPCON: Overall opcon is to COMUSNAVLOGSUPFOR. CAPT Thaemert, N7, is my reporting senior and establishes all priorities and taskings.

2. As discussed with LCDR Phillips, the flow of personnel in and out of PW requires good faith daily coordination, but also allows the most productive load balancing of crews. Much of our tasking is short notice and of limited duration, we remain very flexible.

3. Encl(1) reflects the current manning and distribution of forces, encl (2) what we anticipate the requirements to be by the time we rotate. We agree that it makes sense to only bring in enlisted replacements, N7 will separately assess Officer reqts and replacements. We have also kept the replacement manning tight based on LCDR Phillips firm representation that, if additional assets were needed due to a changing mission, we could get more bodies from the 3rd.

V/R
